

Flipper Graph Control

Smart. Visual. Solutions.

Graphing Capabilities:

Flipper Graph Control allows you to create an endless variety of charts with any combination of lines, points, curved lines, bars, stacked bars, high-low-close in 2D, 2.5D, or true 3D. Including, Bubble, Spider, Pie charts and XYZ surface charts.

System Requirements

Windows 95/ 98/ ME/ 2000/ NT/ XP, 32-bit
ActiveX Support.

Licensing Options

See website for pricing or
call (541) 752 9885.

Custom graphs and charts for applications

Flipper Graph Control enables you to communicate easier and faster by integrating customized charts into your application. Just follow a few simple steps and your data is transformed into colorful, easy-to-understand visuals. You get many advanced tools and tricks not available with spreadsheets, including drill down, user interaction and more. As an ActiveX component, Flipper Graph Control can be used in virtually any development environment supporting this technology.

Features

Customization and Flexibility

Intuitive design based on 15 years of experience

Over decade of experience is invested in making it easy for you to create graph the way you want to.

Tutorial and searchable help file

Get started quickly by following the tutorial and using the searchable index for just the topics you need.

Numerous examples

View the code behind examples for multiple graph types and functionality.

Date/Time data support

Control your scale and increments according to everything from seconds to years.

Data connectivity

Easily tie your graph to a database through ADO to dynamically generate graphs.

Ease of Use

Multiple graph types and combinations

Graph styles include pie, line, bar, area, spider, bubble, surface, 3D and combinations.

Absolute scale control

Let the graph auto-scale or manually set the minimum, maximum and the increment of any axis scale.

Tooltips and drilldown

Display data with mouse-over pop-ups and explore through data with drilldown graphs.

Run-time menus

Edit the graph during run-time with a click of the mouse.

Mouse interaction and data dragging

Drag objects and data, and identify parts of the graph with the mouse.

Zooming and scrolling

Zoom in and out, scroll the axis and define the visible area of the graph with the mouse.

Image importing

Enhance your graph with your own pictures and logos. Import images as part of the graph or as the background.

Stability and Performance

Royalty free run-time distribution

Distribute your application freely with no royalties or added expense.

Award winning architecture

Based on ProWorks own technology that has received awards from Advisor Media.

Free updates

Continue to gain value from free updates with new features and fixes.

High quality technical support

Find comprehensive help from our online support section or receive personal email and phone assistance through a service contract .
